Your Child's Security in School
In the Era of COVID-19

Child Security, Parent Convenience, Smarter Schools

How do I ensure students are picked up by the right persons?

How do I ensure potential Covid-19 students do not report to school?

How so I enforce social distancing within my premises?

What will help me do contact tracing within my school if required?

Fortunately, there's a single solution to all these issues and more...

The Solution

Schools are preparing to reopen; the issue of child security is more important now than ever to safeguard students, teachers, and staff from contracting Covid-19.

SmartSapp ensures a child's security by allowing only authorized persons to pick up/drop off children in school. SmartSapp captures complete information on all persons' dropping off and picking up children from your school. In an unfortunate situation where a parent or delegate tests positive for Covid-19, you can easily isolate students who might be in contact with the Covid-19 person(s). Without effective contact tracing in place, your school could be facing imminent shutdown, if any Covid-19 infections are not managed timeously.

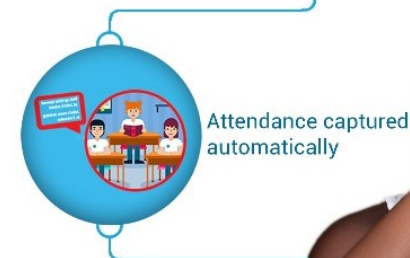

Authorized

Daily Drop-offs

There's no need to start any school day stressed out. SmartSapp's advanced Drop-off feature reduces the amount of time for child drop-off, making early morning congestion at your school a thing of the past. SmartSapp gives you the time each child got to school and who dropped them off. You have quick access to total number of kids who reported to school in each class daily.
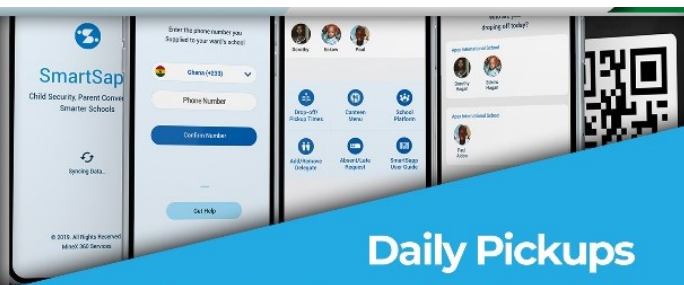

Parent arrives at school, Staff scans to receive ward in less than 30 sec-

Daily Pickups

The end of a school day can be quite chaotic; staff and student safety is often most vulnerable at this time of the day. SmartSapp removes the hassle by securely coordinating the process. Parents and delegates are able to alert schools of their arrival time so children can be made ready for them. Upon arrival, the parent or delegate's identity is electronically verified as authorised to leave with a child.

One missing Child, is one too many!

- Parent alerts school and ward is prepared for pick up
- Person is verified electronically with picture as authorized to leave with a ward
- Pick up record automatically captured

Enforcing Social Distancing

SmartSapp's pickup system includes the ability for schools to set limits on how many persons are allowed in their premises especially during drop off or pick up times. Students are only allowed to leave classrooms when their pickup person's arrive; hence ensuring proper social distancing amongst students as well as parents.

SmartSapp drop-off or pickup happens in less than 30 seconds without parents or delegates getting off their cars. This ensures that there is limited contact between parents or delegates and the rest of the students as well as your staff.

Students COVID-19 Risk Rate Assessment App

Schools can screen for potential Covid-19 cases among students, by alerting parents on a daily or weekly basis, to complete a Covid-19 risk assessment form on SmartSapp. Depending on the responses to the questions, SmartSapp is able to rate the child as high or low risk for Covid-19. The results are instant. The child is either advised to stay home and isolate awaiting further tests or cleared for drop off at school.

Peace of Mind with your child's security in school

Notifying parents on when their wards are in school and when they have left with an authorized delegate is one way SmartSapp gives parents assurance and peace of mind to go about their daily activities.
